Independent Utility Brokers

Flexible Collective

The benefits

- **Increased purchasing power:** add your consumption to that of other businesses to benefit from flexible purchasing and gain access to more competitive contracts.
- **Spread the price risk:** make multiple purchases rather than a single transaction at one point in time.
- **Greater opportunity to get the best tariff:** take advantage of market price dips and avoid price spikes.
- **Peace of mind:** your contract will be purchased according to a pre-agreed Risk Management Strategy. Using advanced risk management software, we will closely monitor market prices, using triggers to ensure strategic and controlled purchasing decisions.
- **Reduced risk premiums:** avoid inflated risk premiums built into fixed contracts.
- **Hassle free:** have your contracts managed on your behalf. We undertake all supplier liaison, purchasing and administration requirements, so you will see no additional paperwork.
- **Less time consuming:** no more constant changing of suppliers to get the best price. The non-energy element of the contract (approximately 40%) is agreed at the outset and fixed for the term of the contract, typically three years.
- **Full invoice validation service:** to ensure your bills are accurate we will check each invoice and resolve any queries.
- **Ease of administration:** All of your electricity and all of your gas contracts expiring on the same date and each utility with the same supplier for ease of administration.

"Collective purchasing and switching have the potential to empower customers to get a better deal on their gas and electricity bills and save individual consumers having to shop around and compare tariffs themselves."

Department of Energy & Climate Change (DECC)

Suitability

The Untied Utilities Flexible Collective has been tailored and structured specifically for our clients.

- **All of our clients are eligible:** we will check that this type of contract is suitable for you and if so, your current contracts will remain in force until their normal expiry date, after which your supply will be transferred to the collective.
